-By way of explanation, we meant to have made a statement, ere this, for the benefit of our subscribers who do not reside in Kansas and, consequently, are not familiar with tax sale proceedings. Jadging from the published list, one would naturally infer that a considerable quantity of land was annually sold for taxes, but as a matter of fact, a great deal of it is never sold, the taxes being paid thereon before day of sale. With many, it is the result of pure careless ss. Some who are entirely able to pay their taxes, almost invariably neglect to Big creek. Everybody is cordially invited do so, until compelled. Others, again, are willing to pay the extra twenty-five cents charged for publication for the use of the money for a short time.

The son of a governor in Kansas has no brighter prospects before him than the son of a farmer or a blacksmith. A man is valued, in this country, for what he can do and not because of his ancestors.—

But there is no reason why the son of a governor would not succeed if he has the right kind of spirit. Everybody, the high, the low, the rich, the poor, have about an equal chance in this country in the race for honor, fame, or riches. As a rule great men's children are not as successful as those of humbler parentage and it is doubtless the result of their early training. They are not taught self reliance and depend entirely too much upon the prestige of their family. Every man must be the architect of his own fortune The parents of our greatest citizens, have never distinguished themselves and are almost entirely unknown. Who ever peard of Lincoln's father? -The editor of the Atchison Globe says brothers and sisters do not love each other. The trouble with the Atchison philosopher is that he recognizes only one kind of love. If he will begin to figure upon the way one loves himself he will discover that it is a very different love from that a fellow feels for his best girl. And yet he will hardly say that men rarely love themselves. The love of brothers and sisters for each other is close akin to self love. And since the great religious daily has started in on this line of in vestigation let the philosopher go on and figure out the meaning of the command: "Thou shalt love thy neighbor as thyself.'-Leavenworth Times.

An Age of Improvement.

We well remember, when a boy, that our part of the work during the threshing season was dragging the straw away from the machine. This was done by attaching a horse to a rail with ropes tied to to either end. We would drive the horse over the straw as it accumulated behind the machine and our weight on the rail would keep it down (sometimes) until we delivered it at the straw stack, where two or three men were employed to pitch it up to the stacker. Sometimes the horse would become unmanesgable, or the accumulation too great, in which event, rail, boy and all would go over. By the time we would get our rail in position again, of course the straw would be piled up to an enormous height and the chance were that we would go over again, and so on, until the machine became choked and it would be necessary to stop the whole business. Of course we were always to blame, and had to assume the respon bility, just the same as though we had done it on purpose. Oh, it was great fun. Perhaps some who read this will remember all about it. Straw carriers, attached to the machine, were introduced, and hauling straw with one horse and a rail became a thing of the past. We don't often refer to it for our recollections thereof are not entirely pleasant. Our next position was that of band cutter and if the bundles were large enough, and properly placed upon the table, this was not so bad, but we have a very vivid recollection of the blisters that used to form on our hands, and the constant dread that we had of cutting the feeder's hands with our band knife, which we always kept as keen and sharp as a Da-

point to remark that if there is any easy place about a threshing machine, never found it, and we have a practical knowledge of what we are writing about.

These things were suggested by a conversation a day or two since with a farmer, who absolutely took away our breath in our county, owned by Baird & Cock-

ment, a very ingenious arrangement whereby the straw is placed exactly where wanted for the stack, and no pitching necessary. This also surprised us as we had never seen anything like it before, but we held our peace and appeared un-concerned. But when he finally told of the machine cutting its own bands, and feeding itself besides—better than could be done by hand, we surrendered and acknowledged that we didn't know much about threshing, in fact had only worked at it a little at odd times for amusement.

These are facts nevertheless, and serve to forcibly illustrate the axiom. "We leave in an age of improvement."

It Is a Slander. The Clay Center Dispatch has the talent ways kept as keen and sharp as a Damascns blade.

Time passed on, we became older, and finally arrived at the dignity, the post of honor about the machine. We became feeder. This too, was hard work, and we want to digress long enough at this point to remark that if there is any easy.

The Cay Center Dispatch has the talent and disposition to recognize piety of a pronounced type, even in a calling like that of the editor, which is always overflowing with the article. Hear it. "Wa Keeney is said to be the only town in the state that has no preacher. This state of affairs has only existed since Col. Tilton moved to

Of course in such rural towns as Clay Center, where the preacher is paid \$100 a year in produce. and a donation and pound party thrown in, the editor is not supposed to know anything about the custom which prevails in the larger and more fashionable cities, of the pastors taking a vacation during the heated summer months. We believe Bro. Tilton will bear us out in the statement, and will cheerfully bear testimony to the fact, that very much of the piety, for which he is now so widely noted, is the direct result of a ten year's residence in Wa-Keeney, coupled with the exceptionally fine church privileges and other means of grace which he enjoyed while here.
